

Abir Mehmed

Full-Stack Developer

abirmehmed@gmail.com | github.com/abirmehmed | abirmehmed.github.io/ocean-portfolio

SUMMARY

Full-stack developer focused on shipping real, working products — POS systems, e-commerce platforms, and real-time web experiences. Comfortable across the stack, from Laravel/PHP backends to React frontends. Open to freelance projects and full-time roles.

SKILLS

Backend: Laravel, PHP, Livewire, Node.js, Express **Frontend:** React.js, JavaScript, HTML/CSS **Other:** WebGPU, Three.js, Git

PROJECTS

UniMart

[Laravel](#) · [Livewire](#) · [PHP](#) | uni-mart.onrender.com

Full-stack POS (point of sale) application with live inventory sync and a shopping cart flow.

Sonix Store

[React.js](#) · [Express](#) | sonix-store.vercel.app

Full-stack e-commerce store with a React frontend and an Express backend.

Open Sea

[WebGPU](#) · [Three.js \(TSL\)](#) | abirmehmed.github.io/ocean-portfolio

Real-time procedural ocean built from scratch — physically-based wave simulation, custom shaders, and procedural audio, running entirely in the browser with no pre-rendered assets. Also serves as this resume's portfolio site.

EXPERIENCE

[Add your work history here — company, role, dates, and 2-3 bullet points per role. This section is intentionally left blank; nothing here is real.]

EDUCATION
